Get maximum benefits from your interior space without renouncing a limitless view.

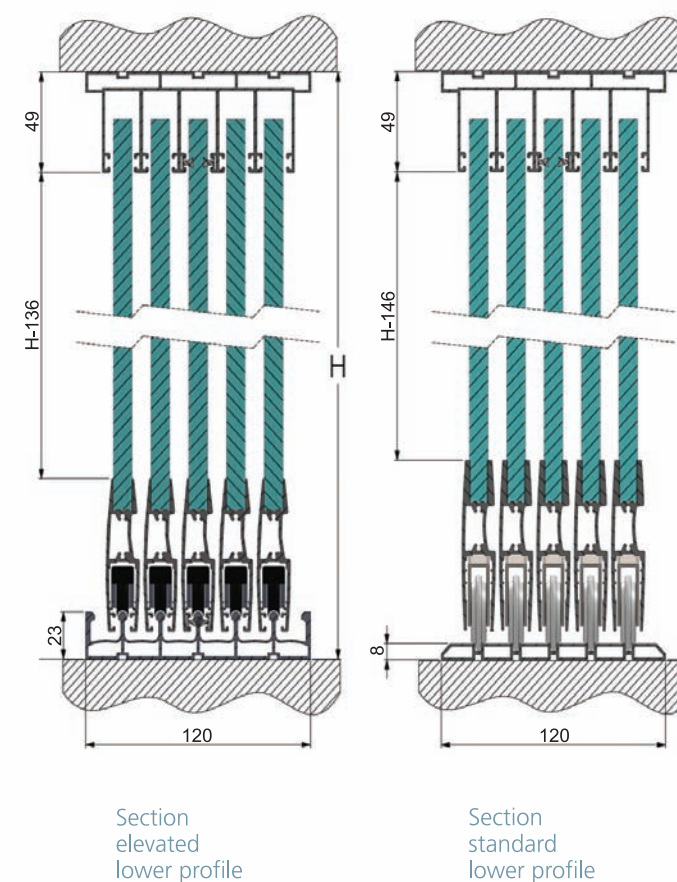

seeglass-run is C3 Systems' new frameless glazing enclosure system with sliding panes. This system offers you the possibility to move the panes horizontally and parallel from one side or both. When opening or closing the first pane, it pulls the remaining ones thanks to the drag stoppers built into the system.

This modern and practical system can be installed in a variety of locations from conservatories, terraces and commercial units. **seeglass-run** creates new spaces and gets maximum benefits from the existing ones. Furthermore, with this system you can enjoy limitless views whilst feeling protected from bad weather turning your space into a place to relax.

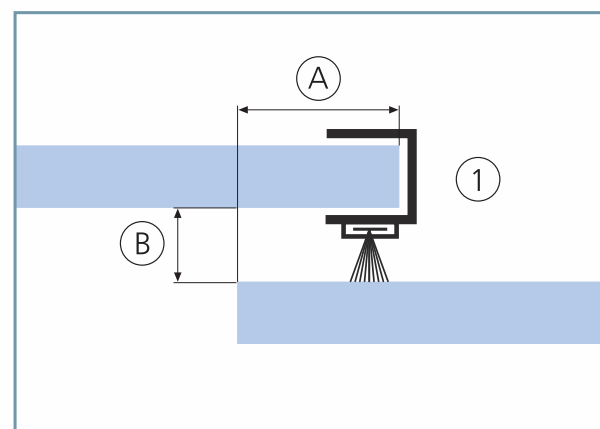

The sliding panes of the systems are supported on the lower guide profile. The bearing components allow the displacement of the panes in a quick, easy and optimal way. The system can be easily installed without carrying out expensive building works. Possible construction slopes are not a problem for installation.

DETAILS OF THE SYSTEM

- Possibility to displace the panes to the right or left.
- Tempered security glass of 10 mm.
- Possibility to compensate until 20 mm height thanks to upper profile.
- Possibility to adjust pane lower bearing hinges in 5mm height.
- Pane maximum width 900mm.
- Maximum height 2,5m.
- Stainless steel components of easy handling and integrated into profiles.
- Ball bearing components made of stainless steel integrated into profiles with low wear and maintenance.
- Lower guide profile of low height.
- Drainage water system in lower profile.
- Variety of knobs and finger handles to drag the first pane.
- Optionally with or without lateral frames.
- Optionally with or without lateral pane frames.
- Possibility of lateral blockage without interior lock.
- Possibility of lock closing to wall or floor for the first pane.
- Easy handling of the first pane and the next.
- Variety of configurations.

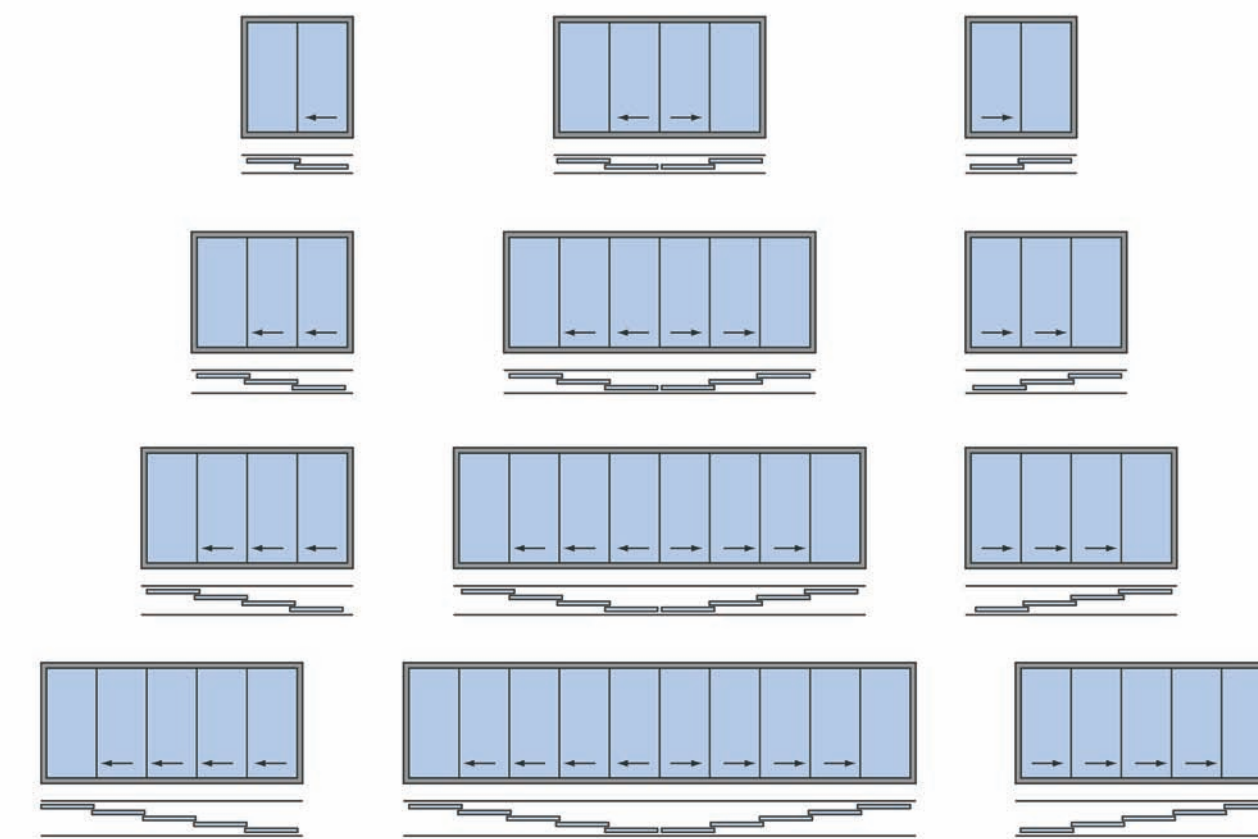

SEALING AND VENTILATION

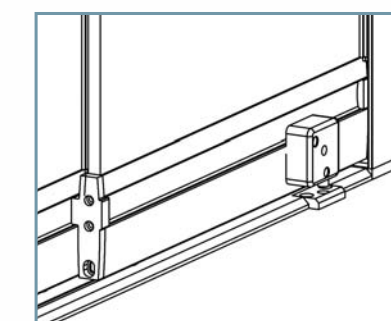

Detail of overlapped panes
(Interior view)

- Sliding panes overlap vertically 16mm. (A)
- Separation of panes is approximately 12 mm. (B)
- Separation sealing in overlapped panes by means of aluminium profile and incorporated brushes. (1)
- Brush sealing is also horizontally positioned in the upper pane profile.
- Lateral profiles do also comprise brushes at both ends.

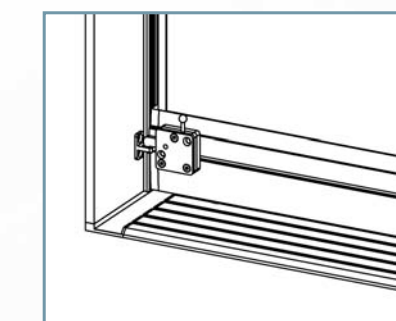

EXAMPLE OF POSSIBLE CONFIGURATIONS

COMPONENTS

KEY LOCK
Key lock to floor in folded-deployed position for panes at both ends.

SELF-CLOSING LOCK
Available for panes at both ends.

FINISHES

Standard finishing of the system in Silver Matt.

Available in other finishes according to RAL chart and also in a wide range of anodized ones. Please ask for colour chart.
